Soaring for Excellence Through Grace and Knowledge

Attention ECS Parents and Students:

In a time when school systems are cutting back and many private schools are closing, we are very excited to announce that the long awaited Smart Boards will arrive in mid January of 2011! The purchase order for \$100,000 has already been sent and the order is being processed as of last week. For those who are not familiar with Smart Boards, they are internet interactive computer boards which allow teachers and students to have instant access to the world using one learning tool. In addition, Smart Boards are recognized nationally as one of the most effective learning tools for students in all grade levels. Every classroom will be equipped with a Smart Board and teachers will be specially trained on the effective use of this technology. Smart Boards will provide teachers with the capacity to differentiate instruction to meet the needs of all of our learners.

We are one of the few schools in Prince Georges County to have Smart Boards in **every** classroom. While your tuition has not increased over the past two years and will not be increased next year, your child will have the opportunity to experience 21st Century technology that students in the most affluent and prestigious schools experience. Soon after they are installed, there will be a special PTO meeting during which you will be able to witness first hand this amazing learning tool. We are truly committed to providing the best learning environment for your child and we thank you for the opportunity to serve you.

SOARING HIGHER
With SMART BOARDS
